What are institutional web portals?

Central Inter/Intranet pages that display content and provide links to institutional tasks and information

How can a web portal help an institute?

- Centralizes curricula resources and administrative records
- Allows efficient access to information and tasks
- Streamlines administrative processes

What kinds of information can a portal administer?

Curricula	Students & Staff	Program
Online curricula	Schedules	Course/Teaching/Class/Lab Schedules
Supplemental Materials	Bio Data	Deadlines and Administrative Communiqués
Auxiliary Materials	Assessment Records	Program Statistics
Curriculum Grading Criteria	Qualification Records	Hardware inventory and status

What kinds of tasks can a portal administer?

Curricula	Student/Staff	Program
Assessment	Attendance	Surveys
Materials Sharing	Teacher Schedules	Student Enrollment
Materials Feedback	Question of the Day	Report Problems

Who benefits from institutional portals?

Students

- Students receive content specific for their needs
- Students benefit from an efficient and fast assessment process

Teachers

- Immediate access to institutional teaching resources and institutional policy
- Efficient task completion

Administrators

- Instant access to program/course data
- Efficient information collection and dissemination
