

"Institutional Administration and Resource Management Through Technology"

Edward Chaffin and Randy Gonzales

The System Defined

- ✍ The system is designed to integrate procedures and technology to produce maximum efficiency and effectiveness.
- ✍ At the heart of the system is a collection of databases and web-interfaces designed to centralize information and processes.

The Technology

- ✍ Database
 - MS Access
- ✍ Internet Technologies
 - Active Server Pages
 - Internet Information Server
- ✍ Scripting Languages
 - VBScript
 - JavaScript
- ✍ Internet Browser

What can be handled by such a system?
